- Built a responsive blog page using HTML and CSS.
- Cloned a registration form and a webpage using CSS, improving design and layout skills.
- Created a responsive webpage using Bootstrap, ensuring mobile compatibility.
- Worked on frontend and backend integration, enhancing skills in Java Full Stack Development.

## Education

---

2021 – present  
Paritala, Andhra Pradesh

### Bachelors of Technology | Computer Science Engineering

*Amrita Sai Institute Of science and Technology*  
CGPA 8.72

2019 – 2021  
Vijayawada

### Intermediate

*Sri Sarada Junior College*  
978/1000

2018 – 2019  
Vijayawada

### SSC

*Ideal E M High School*  
9.8/10

## Projects

---

### User Authentication System

*Bisection of user authentication system in the real world application*

- **Description:** The user authentication system is designed to ensure secure access to an application or platform by verifying the identity of users. It typically includes features like user registration, login, password reset, and account management. The goal is to protect sensitive data and provide a seamless user experience.
- **Technologies Used:** REACT JS, TAILWIND CSS, DATABASE -MANGODB.

### Banking Management System

*A mini-project using Core Java concepts*

- **Description:** Developed a comprehensive Banking Management System using Core Java to streamline banking operations and enhance customer experience. The system allows for efficient management of customer accounts, transactions, and services.

- **Key Features:** Developed a robust account management system that supports both Current Accounts and Savings Accounts, each with distinct characteristics and functionalities. This feature allows users to create, manage, and interact with their accounts based on their specific needs.

**Weather App**

*Weather App using JavaScript*

- **Description:** This project is a web-based application developed using HTML, CSS, and JavaScript. It allows users to manage their daily tasks efficiently.
- This allows users to check the weather of a place, city , State and ensure the effective task management .
- The whole functionality depends on fetching of API using the javascript.
- **Technology used:** Html ,Css, Javascript

**Meesho Clone**

*A clone of the meesho E-commerce website to enhance my skills on front-end technologies.*

- **Description:** Developed a clone of the Meesho e-commerce platform using HTML, CSS, and Bootstrap to replicate its design.
- This project focuses on the frontend, built using HTML, CSS, Bootstrap. It mimics the functionality and appearance of the original Meesho website, allowing users to browse and purchase products, add items to their cart, and checkout
- **Technologies Used:** HTML, CSS, Bootstrap
